

STUDENT INSTRUCTION / INTERNET OF SENSES

READ THE PDF

Your group will be given a specific **topic**. Read the pdf and watch the two videos with your topic in mind. In class, your group will answer the questions below together. While you read, think of the questions and write down some key words. Bring your key words to the group discussion in class.

DISCUSS WITH YOUR GROUP

Discuss the questions below. Everyone in the group should take individual notes, to be brought to the presentation in the end of the class.

- What is the internet of senses?
- Exemplify how this technology may change and affect everyday life relating to your group's topic. Use terms such as AI, AR, VR, dematerialization, post-privacy, merged reality, avatar.
- Write down 1-2 opportunities and 1-2 threats for the climate/sustainability, that this technology may bring relating to your topic. Choose one example that is presented in the pdf, and think of one example of your own.
- Write down the risks you see related to data, privacy and security, and how they can be met.
- Do you see any risks if this technology would not be accessible to everyone?
- Who is behind the pdf? Are they generally positive or critical to the technology? Do you think that they convey a realistic image or do they exaggerate/understate the opportunities and/or risks? If so, why do you think that is?
- Write down something you find extra interesting/intimidating/inspiring about this technology, to be discussed in class.

PRESENTATION

Present your group's results in cross-groups. Bring your individual notes as support.
